

a) If (head == NULL)

```

{
    head = newnode;
    head->next = newnode;
}

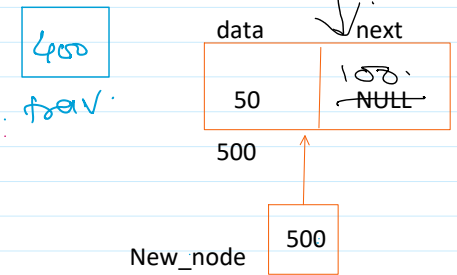

```

- ① Create a node
- ② update the data part
- ③ Attach.

- 1) Traverse till the last node.
 struct node * trav = head;
 while (trav->next != head)
 trav = trav->next;

- 2) Link the last node to the new node.

trav->next = newnode;

- 3) Make it circular.

newnode->next = head;
